PROFILE

Computer engineering student specializing in Mobile Information Systems, with hands-on experience building mobile, backend and AI-powered products through internships and team projects. Seeking a final-year internship (PFE) starting January 2027 in mobile, full-stack or AI/product development.

EDUCATION

Engineering Degree in Computer Science – ESPRIT 2024 – 2027

Specialization: Mobile Information Systems — final year (2026–2027)

Top of the class (Major de promotion), 2025/2026

Integrated Preparatory Cycle – ESPRIT 2022 – 2024

Information Technologies

Scientific Baccalaureate – Lycée Rue El Attarine, Ariana 2022

Honors: Good Standing

ADDITIONAL TRAINING & CERTIFICATIONS

- AWS Academy Graduate – Cloud Foundations – Amazon Web Services (2026)
- Introduction to Modern AI – Cisco Networking Academy (2025)
- CCNA: Switching, Routing, and Wireless Essentials – Cisco Networking Academy (2025)
- Mobile Development Training – Flutter – Orange Digital Center (2025)
- Machine Learning Certification – GOMYCODE (2023)

PROFESSIONAL EXPERIENCE

Mobile Developer Intern – Orange Digital Center Tunisia Jul 2026 – Present

Orange Summer Challenge · Team Arcana Soft

Tunis, Tunisia · On-site

- Backend and mobile developer in a cross-functional team (web, backend, mobile, AI) building a battery health platform for telecom operations
- Implemented backend services (NestJS, PostgreSQL) and the offline-first Flutter application used by field technicians

Software Engineer Intern – EKLECTIC Jun – Jul 2026

Android & security

Tunis, Tunisia · Hybrid

- Designed and developed an end-to-end secure telemetry platform: an autonomous Android client and a central Symphony API
- Implemented device registration, OAuth 2.0 authentication with RSA-signed JWTs and Redis, and scheduled background synchronization

ABAP Developer Intern – SIRYOS (SAP Gold Partner) June – July 2025

SAP RAP

Tunis, Tunisia · On-site

- Developed an application based on the ABAP RESTful Application Programming (RAP) model
- Implemented business logic using Behavior Definitions and Projections
- Set up security layers using CDS Access Controls and authorization objects
- Managed advanced transaction handling: EML, ETags, and custom error management

Marketing & Data Analysis Intern – Ipsos MENA Summer 2023

Market research

Tunis, Tunisia · On-site

- Conducted quantitative and qualitative data analyses
- Contributed to writing reports and presenting strategic insights

PROJECTS

Orange Smart Batteries – Telecom Battery Health Platform 2026

Flutter, Dart, Riverpod, Angular, NestJS, TypeScript, PostgreSQL, Drizzle ORM

- Intelligent platform that monitors and predicts the health of telecom batteries to anticipate interventions and optimize maintenance
- Combines an admin web portal, an offline-first mobile app for field technicians and performance indicators

WalkAndWin – Secure M2M Telemetry Platform (EKLECTIC)

2026

Kotlin, Jetpack Compose, WorkManager, Symfony, Redis, OAuth 2.0, JWT, Docker

- Secure Android platform pairing an autonomous mobile app with a central API for background telemetry synchronization
- Automates device identification, OAuth 2.0 authentication and data exchange

SamOps – Multi-Tenant FinOps Dashboard

2026

Next.js, TypeScript, Tailwind CSS, Supabase, Better Auth, Recharts, Playwright

- Team project: web dashboard centralizing cloud costs, anomaly detection and budget management in one multi-tenant workspace
- GitHub- and AI-assisted remediation workflows; live at samops.app

Styleto – AI-Powered Fashion Mobile App

2025 – 2026

SwiftUI, Kotlin Jetpack Compose, NestJS, MongoDB, Computer Vision, Hugging Face

- Cross-platform app with automatic clothing detection, personalized outfit recommendations, virtual try-on and a digital wardrobe
- Backend with NestJS and a real-time marketplace with messaging; AI models deployed on Hugging Face Spaces

WeFarm – Smart Agriculture Platform

2024 – 2025

Symfony, PHP, JavaFX, MySQL, Bootstrap, AI/ML

- Web and desktop platform connecting farmers and agricultural workers, with AI/ML-assisted search, recommendations and face recognition
- Selected among the best projects at ESPRIT's Bal des Projets 2025; produced a promotional video

SKILLS

Languages: Java, Python, C/C++, C#, JavaScript, TypeScript, PHP, Kotlin, Swift, Dart, Go, ABAP

Mobile: SwiftUI, Jetpack Compose, Flutter, React Native

Web & Backend: NestJS, Symfony, .NET, Next.js, Angular, REST APIs

AI & Data: Machine Learning, NLP, Computer Vision

Databases: MongoDB, PostgreSQL, SQL, Firebase

Cloud & Security: AWS, Docker, Redis, OAuth 2.0, JWT

Tools: Git, Linux (Ubuntu), UML, Android Studio, Xcode, IntelliJ, VS Code

SAP: ABAP, RAP

LANGUAGES

Arabic (Native) • French (B2) • English (B2) • Spanish (A2)

AFFILIATIONS & ACTIVITIES

Active Member – IEEE CIS Chapter

Oct 2024 – Oct 2025

Participant – IHEC Chatbot Hackathon Challenge

January 2025

INTERESTS

Music (kanun, piano, guitar), Photography, Travel, Animals
